

## Technical Analysis 101 with Ralph Acampora - Virtual Recording

Recorded May 4, 2010

Technical Analysis offers a professional understanding of how to chart the stock market. Students develop an excellent foundation in each type of tool as well as the various technical theories. This course is designed to teach risk management to traders and investors.

Take this class without ever leaving the office via our Virtual Classroom (Virtual NYIF). Accessible from any internet connected computer - regardless of where you are geographically. All you need is an internet connection, a browser and speakers or audio headphones!

### Targeted Audience

Portfolio managers, traders (especially principal traders), academics wishing to expand their knowledge in behavioral finance.

### Advance Preparation

No advance preparation required.

### Learning Objectives

Students will be able to:

- . Construct four types of charts
- . Identify support/resistance levels and price trends
- . Interpret price/volume characteristics
- . Understand pattern recognition

### Alumni Comments

*"Virtual class was excellent quality and Ralph Acampora is definitely the best at what he does!"*

*"Great course. It was an all-around synopsis with a great speaker. Technically well organized too."*
